

## **ASTROLOGICAL PREDICTIONS ON CORONA VIRUS – COVID-19**

**By**

**Dr.A.P.Rao and Mrs.Radhika Kothuri**

The corona virus popularly called COVID -19 is threatening the world in all possible ways – health wise financially and in many other points. Financial markets have tumbled world over and travel plans have gone haywire throughout the world. The chaos it is producing is beyond description. A pneumonia of unknown cause detected in Wuhan, China was first reported to the WHO Country Office in China on 31 December 2019. WHO is working 24/7 to analyse data, provide advice, coordinate with partners, help countries prepare, increase supplies and manage expert networks.

It is supposed to have originated in china in the town wuhan in Dec 2019. Taking the published date of reporting the first case, a horoscope is cast and based on that the following predictions are made. Basically six bad planets being in Dhanus is responsible as for astrological terms. The moon being in third house as eighth lord is being aspected by sani and mars giving the severity it is showing.

Till now, as of March 10<sup>th</sup> 2020, over a lakh people are affected and nearly 4000 people have died. Its mortality is reported to be about 2.5 to 3.5 % - i.e out of 100 patients attacked by the virus about 2 to 4 persons are dying. It is reported to be very much virulent in its spreading and so far there is no vaccine or reliable treatment for this.

Based on the chart the virus spread will continue till the next period of 20th march 2020 at the same rate as ofnow. Even though it continues to be virulent some good developments may occur like cooperation between different countries and exchange of information both about persons and their contacts and also about treatment methods and other protocols being followed for containing its spread.

From 20th march, 2020 to 24th May, 2020 there may be explosive growth in the number of patients affected and the mortality. The stage has come for many countries to declare endemic condition. People and health authorities might feel a state of helplessness and most important activity of countries will be to contain the panic and helplessness of people. The number affected and deaths may have an exponential growth.

From 24th May, 2020 to 13th July, 2020 there may be some relief in its spread and also in treatment procedures and preventive measures. There may be slight relief from 13th July, 2020 to 2nd August, 2020 there may be another spike in its spread and virulence. Thus people may face a real crisis in this period and totally helpless. Many countries will be forced to employ emergency measures.

From 2nd August, 2020 onwards there will be a great relief and almost its containment if not total eradication. There will be a successful treatment procedure or even vaccine and containment measures will be in place.

From 18<sup>th</sup> Oct, 2020 onwards there may be a decaying nature in its virulence and spreading to the relief of mankind.
